

# Agile Mindset Workshop

## In Brief

With the Agile Mindset Workshop we support you in implementing an agile way of working by reflecting the current culture in your organization and creating a new mindset for the agile setup. Functional organizations are at the forefront of agility, organized by roles and competencies rather than titles or rank. Companies organize themselves in an agile way to respond more quickly to dynamic changes in the market.

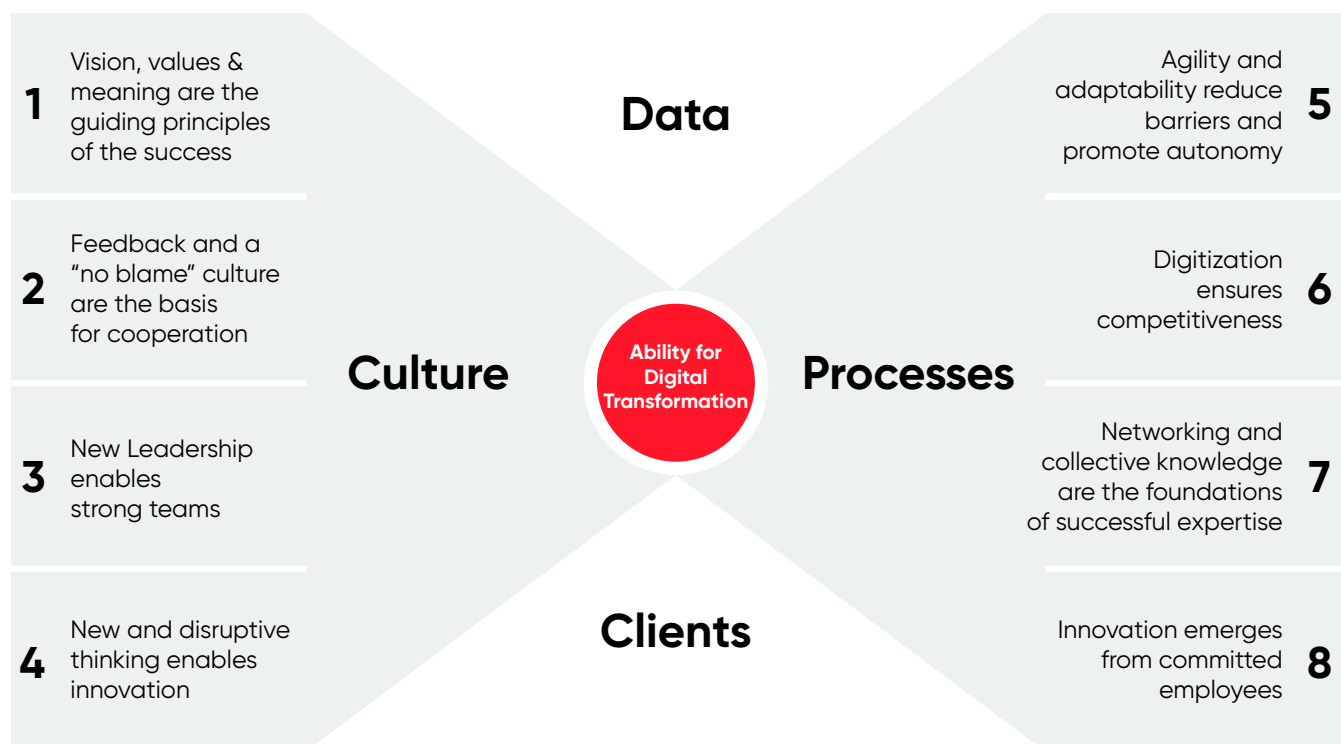

**Great Place To Work®**

## You will ...

- ... learn why an agile mindset is important in today's working environment
- ... identify cultural and process drivers of the agile mindset and derive appropriate measures
- ... define success criteria for the application of the agile mindset

## Content

A mindset needs the commitment of employees to develop. And since processes and culture influence each other, the development of an agile mindset considers both the culture and process perspectives, each consisting of four dimensions. These dimensions are worked on by the participants during the workshop. The workshop concludes with the development of concrete measures for the transfer of the mindset into the workplace culture.

## Budget & Duration:

- Full-day workshop (6-8 hours) up to and including 12 participants (one consultant): CHF 6'500
